

Towards a New Metaphysics of Cosmic Evolution (Paperback)

By Kathleen Milliere

Createspace Independent Publishing Platform, 2018. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. This work proposes that the course of biological evolution cannot be explained by an appeal to a single principle, like survival of the fittest, suggesting instead that its causes are both numerous, and varied. It offers a brief epistemological critique of the principle of natural selection and explains how the over-all course of biological evolution might be subsumed under the same laws which govern the course of cosmic evolution. Finally, it explores some of the metaphysical consequences of this new perspective, including the simultaneity of existence across dimensions, the teleological nature of all physical laws, and the corresponding idea that the future causes the past. The proposed new perspective allows for a multiplicity of causes, including the natural influences of entropy on genetic recombination, one-time impact and near-impact events in space, and the possibility of interference by forces in different dimensions.
