Supplement 33** eBook, you should access the link under and download the document or have accessibility to other information which might be in conjunction with SILVER AND THE SILVER ECONOMY AT HEDEBY : RAW MATERIALS, INNOVATION, TECHNOLOGY OF ANCIENT CULTURES RITAK 2. DER ANSCHNITT. SUPPLEMENT 33 ebook.

VML Verlag Marie Leidorf Dez 2016, 2016. Buch. Condition: Neu. Neuware - Der Handel mit Silber im wikingerzeitlichen Skandinavien ist eng mit der Entwicklung und dem Zusammenbruch von Fernhandelsrouten verbunden, die sich vom Nordatlantik im Westen bis nach Zentralasien im Osten erstreckten. Das wikingerzeitliche Emporium Haithabu war ein wichtiger Umschlagplatz zwischen Ostsee und Nordsee und ist daher eine ideale Fallstudie, um die Entwicklung der Silberversorgung im 10. und 11. Jahrhundert n.Chr. zu untersuchen. Die elementare Zusammensetzung und die Bleisotopie der in Haithabu geprägten Münzen wurden mit Schmuck, Hacksilber und importierten Münzen verglichen. Vier chronologische zusammenhängende Verschiebungen konnten ausgemacht werden, in denen sich Veränderungen im Ursprung und in der Art des verwendeten Rohmaterials zeigen. Für diese Untersuchung wurden mit einem Laserablations-Massenspektrometer etwa 200 Silberobjekte analysiert und die Ergebnisse in den weiteren Kontext der frühmittelalterlichen Silbermetallurgie, des Bergbaus und der Numismatik eingebettet. So lassen sich Veränderungen in der Zusammensetzung als Veränderungen im Handel interpretieren. Zusätzlich wurden auch Schmelztiegel und Bleiobjekte aus Haithabu, sowie Erze und Schlacken aus Zentralasien untersucht, um einen Beitrag zu Recycling und Silberproduktionstechniken während der Wikingerzeit zu leisten. The trade of silver in Viking Age Scandinavia is intertwined with the development and collapse of long distance trade routes stretching as far as the North Atlantic in the West to Central Asia in the East. Hedeby, a Viking emporium, was an important gateway of trade between the Baltic and North Seas, and this makes it is an ideal place to explore the evolution of the silver supply in the 10th and 11th centuries A.D. The elemental and lead isotope compositions of locally minted Hedeby coins were compared to jewelry objects, hacksilver and imported silver coins, and four chronologically related shifts could be identified that reflect changes in the origin and type of raw materials used. This study features the use...
