Createspace Independent Publishing Platform, United States, 2015. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.This is a procedure guide and reference for PATIENTS, FACILITATORS (people who are helping the patient), PHYSICIANS. This book is designed to advance the movement against cancer to the next level by providing step-by-step methods for accessing state-of-the-art research and treatment protocols and information. The claim is made that there is one and, really, only one practical and rational approach to cancer, as is explained in this book. Within about 30 minutes, using the easy to follow routines here, you can obtain the state-of-the-art protocols for the diagnosis and treatment of any type of cancer. Then, advance to the information on Alternative and Supportive care and how Experimental Trials and Phase I Life-Extension Applications might apply to your interests. The conventional approach to cancer is not really working; and we are in a rapid transition to a new order of medical science. However, it will require the involvement of a large number of people to advance it. And the eventual conquest of cancer requires a fundamentally different direction - one which we call the Life-Extension Control of Ageing Approach. This book is relevant at any stage (i.e., newly diagnosed, in treatment, in remission, or recurrent) as well as for prevention. If you are dealing with cancer - this book is an essential tool.
