

Practical mathematics for the engineer and electrician

Filesize: 6.56 MB

Reviews

Without doubt, this is actually the best job by any publisher. It is written in basic phrases instead of difficult to understand. You will like the way the author publishes this publication.

(Dr. Marvin Deckow)

PRACTICAL MATHEMATICS FOR THE ENGINEER AND ELECTRICIAN

To save **Practical mathematics for the engineer and electrician** PDF, you should click the hyperlink beneath and save the document or have accessibility to other information which might be highly relevant to PRACTICAL MATHEMATICS FOR THE ENGINEER AND ELECTRICIAN book.

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 28 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1912 Excerpt: . . . feet, w 6 feet and v 168. --Answer, h 4 feet. 4. In the equation $a = wr^2$, if $r = 2$ feet, what does a equal--Answer, $a = 12$. 5664 square feet. 5. In the equation $c = 2 \pi r$, if $r = 2$, what does c equal--Answer, $c = 12$. 5664 feet. We have learned that we can find the volume of a circular tank by multiplying the area of the base by the height. Now, the equation for the area is as we have just seen: $a = \pi r^2$. Therefore, if v is the volume and h the height, $v = a \times h$, or $a h$, which equals $\pi r^2 h$. Since $a = \pi r^2$, multiplying a by h is the same as multiplying πr^2 by h . So we say $a h = \pi r^2 h$. Hence $v = \pi r^2 h$. 6. Using the above equation, find the capacity of a circular tank if $r = 3$ feet and $h = 5$ feet. --Answer, 141. 372 cubic feet. 7. If a circular tank is to hold 300 cubic feet, and its radius is 4 feet, what must be its height Use the same equation as in Example 6 and find what number you must multiply πr^2 by to give 300. --Answer, nearly 6 feet. Adding and Subtracting Algebraic Quantities. Addition and subtraction in algebra are like addition and subtraction in arithmetic. Addition is like balancing an account. If a man goes into business with a capital of 10,000, and owes 4,...
