BEHAVIOR MODELS FROM 3D-SENSED BODY GESTURES AND AUDIO UTTERANCES (PAPERBACK)

Editions universitaires europeennes EUE, 2018. Paperback. Condition: New. Language: English . Brand New Book. This research proposes deterministic and probabilistic generic multimodal behavior understanding models from body gestures and vocal utterances sensed by Microsoft Kinect technology. The proposed deterministic model is based on Moore Machine principles while the probabilistic model is a machine learning approach using Hidden Markov Models. The models have been implemented in a friendly graphical system which encompasses detecting, recognizing, discovering, learning, predicting and measuring human emotional...
