A Telescope on Society: Survey Research and Social Science at the University of Michigan and Beyond (Hardback)

By -

The University of Michigan Press, United States, 2004. Hardback. Condition: New. Language: English . Brand New Book. A Telescope on Society seeks to convey the development of social science in the twentieth century through its interaction with a major new instrument for gathering data about society-survey research. The story of survey research and social science is largely told by social scientists affiliated with the Survey Research Center (SRC) and Institute for Social Research (IRS) at the University of Michigan about work done there. But the book also places this story in the broader context of survey-based social science in the United States and the world, to which many individuals and institutions beyond SRC, ISR, and Michigan have also contributed. The chapters of this volume illustrate the impact that developments in survey research have had and continue to have on a broad range of social science disciplines and interdisciplinary areas ranging from political behavior and electoral systems to macroeconomics and individual income dynamics, mental and physical health, human development and aging, and racial/ethnic diversity and relationships. The volume will speak to a wide audience of social science and survey research professionals and students interested in learning more about the broad history...
